

Need to be GASB compliant?

We've got you covered.

Visual Lease makes it easy to get and stay compliant with GASB accounting standards (GASB 87, GASB 54 and GASB 96).

Account for all your contracts in a single subledger.

Compliance starts with complete data. See all your contracts in one place (e.g. leases, SBITAs) and generate journal entries automatically.

Maintain auditability through every modification.

As contracts and the requirements change, stay audit ready with software that can keep up. Track every change with a comprehensive audit trail and ensure every action is by the book with integrated internal controls.

Stack your tech with powerful integrations.

Connect your data to every system within your organization with secure, auditable file transfers and flexible APIs. Seamlessly connect your ERP and have the flexibility to align every line in your general ledger or track rent payments within accounts payable.

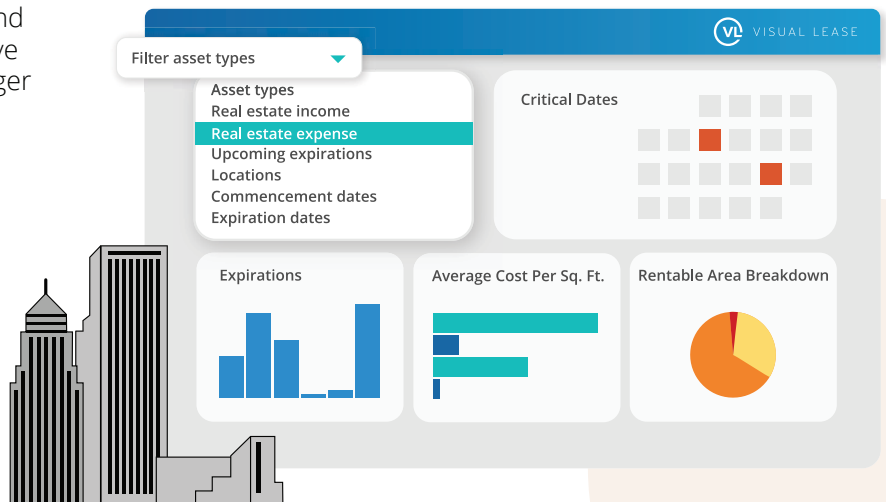

Automate compliance with complete confidence.

Generate the journal entries, disclosures, reports and footnotes you need to stay compliant, automatically.

Leverage our library of one-click report templates built by accounting experts with transparent calculations backed by a SOC I Type II certification. Or, set up reports on the fly with our robust ad-hoc reporting engine.

Configurability that feels custom.

Take control of your data and set up the system any way you want with complete configurability, without the headache of custom code. Our solution is highly configurable, enabling your organization to easily capture any unique lease scenarios.

The proven path to compliance.

Hit the ground running with Visual Lease in **90 days or less** with a tried-and-true implementation process backed by our team of experts.

Analysis

We learn your company's unique requirements.

Configuration

We set up Visual Lease to meet your needs today and into the future.

Conversion

We migrate your data into Visual Lease.

Validation

We work with you to ensure your setup meets your requirements.

Production

You go live!

Experts included. Never extra.

Some accounting solutions charge extra for access to experts. Not us.

We're here to help. Every implementation gets a dedicated team to configure Visual Lease to your business and set you up for success. Once you're up and running, our experts are here to help you stay compliant and in control, even as your leases, contracts and the regulatory requirements evolve.
